EDUCATION

Integrated MSc in Computer & Telematics Engineering, Aveiro University 2019 - 2024

Relevant Coursework: Algorithms & Complexity, Network Security, Information Security, Artificial Intelligence, Databases, Service Engineering & Management

TECHNICAL SKILLS

Frontend	HTML, CSS, Tailwind CSS, TypeScript, Next.js
Backend	Java, Python, Django, NestJS, SQL, REST APIs (Swagger)
Tools & Platforms	Git, GitHub, Docker, RabbitMQ, MQTT
Networking	Synology NAS, UniFi and TP-Link routers

EXPERIENCE

Full Stack Software Developer Jul 2025 - Present
Wish and Cook Aveiro, Portugal

- Developed and maintained production-grade kitchen automation platforms with IoT integration
- Built scalable backend and frontend systems using Django, Next.js, and NestJS
- Designed and managed secure infrastructure, including networking, data protection, and backup strategies
- Implemented real-time communication systems using RabbitMQ and MQTT
- Established documentation standards and agile workflows to support a fast-paced startup environment

Professional Internship Jan 2025 - Jun 2025
Wish and Cook Aveiro, Portugal

- Developed and documented new platform features in a production environment
- Built backend services (Django) and responsive frontend interfaces (Next.js)
- Used Docker for development, testing, and deployment workflows
- Provided network support, including configuration and troubleshooting of routers and switches

Summer Intern Jul 2023 - Aug 2023
Apside Portugal Aveiro, Portugal

- Developed an IoT-based meeting room scheduling system with real-time e-paper display
- Collaborated in an agile team across the full project lifecycle
- Worked with .NET Framework, React, Arduino, and Raspberry Pi

PROJECTS

Automated Kitchen Intelligent System | *Next.js, NestJS, Python, PyTorch, Pandas, NumPy, Docker*

- Designed and developed a microservices-based intelligent kitchen assistant
- Built a neural network model to predict inventory needs and optimize supply management
- Improved system scalability and modularity through containerized architecture
- Strengthened problem-solving and collaboration skills in a team-based environment
